### DETAILED ACTION

This office action is in response to the amendment filed 6/30/2006. Currently claims 1-20 are pending. Claims 1 and 4 are amended and claims 15-20 are new.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Reference 2002-178813A.

In regards to claims 17-20, JP2002-178813A, shows a seat (1) comprising:

a load sensor (21) provided at a seat body (see Figure 2);

a controller (25) for calculating a detection load value (S0) and for determining an occupant sitting on the vehicle seat (1) by comparing the detection load value (S0) and a predetermined threshold value (A);

a determining means (20) for determining whether or not a child restraint system is equipped on the vehicle seat (1) based on a variation of the detection load value (Paragraphs 32-35); and,

a detecting means (See Figure 4, top element of controller (25)) for detecting whether or not the vehicle is stopped;

wherein the detecting means (See Figure 4, top element of controller (25)) detects the vehicle stop condition based on at least one of an ignition switch signal (See Figure 4, top element of controller (25));

wherein the determining means (20) determines whether or not the child restraint system is equipped on the vehicle seat (1) based on the variation of the detection load value (S0) from a maximum detection load value (SM) detected after a seatbelt (11) is fastened (Paragraph 41-46);

Art Unit: 3616

wherein the controller (25) is connected to an ignition switch (See Figure 4, top element of controller (25)) and a seatbelt switch (12a);

wherein when the child restraint system is determined not to be equipped on the vehicle seat (1), it is determined whether an occupant sitting on the seat is an adult or a child (Step 113; Paragraph 47);

wherein when the detection load value (S) is greater than the predetermined threshold value (A), it is determined that the occupant sitting on the seat (1) is an adult (Step 114);

wherein when the detection load value (S) is smaller than the predetermined threshold value (A), it is determined that the occupant sitting on the seat (1) is a child (Step 115; Paragraph 48).

### ***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

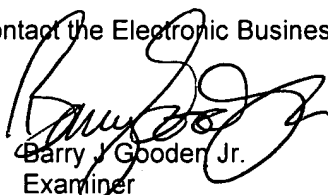

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
